PROFESSIONAL SUMMARY

Highly motivated Java Full Stack Developer with 2+ years of experience, specializing in designing and deploying scalable, secure enterprise applications. Proficient in Java, Spring Boot, Microservices, React, REST APIs and SQL, with expertise in modern DevOps practices including (AWS, Azure) and Docker. Proven ability to optimize database performance, enhance user experience, and streamline development workflows in agile environments.

TECHNICAL SKILLS

Languages	Java (8, 17, 21), SQL, Java Collections Framework, OOP
Back-End	Spring Boot, Spring MVC, Spring Security, Microservices, Hibernate/JPA, REST APIs, Kafka
Front-End	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
Databases	MySQL, Oracle SQL, Microsoft SQL Server (MSSQL), JDBC
Cloud & DevOps	AWS, Azure, Docker, Kubernetes, Jenkins, Git, GitHub, Maven
Testing & Tools	JUnit, Mockito, Postman, IntelliJ IDEA, VS Code, STS

PROFESSIONAL EXPERIENCE

Java Full Stack Developer Eidiko Systems Integrators	July 2024 – Present Hyderabad, India
---	---

- Designed scalable REST APIs using Java, Spring Boot, and Microservices, while optimizing MySQL/Oracle queries to cut API response time by 30%.
- Engineered responsive React front-end components, accelerating page load speeds and overall UI performance by 70%.
- Integrated Azure, Docker, and Jenkins into deployment workflows, cutting production delivery cycles by 50%.
- Participated across the full SDLC including requirement analysis, architecture design, Unit testing, and cross-functional production support.

PROJECTS

Fundamental Credit Reviewer – Case Management System <i>MySQL</i>	<i>Java, Spring Boot, Microservices, React, JWT,</i>
---	--

- Built a secure banking platform with JWT and OAuth2 authentication, integrated Kafka and RabbitMQ queues to drop case resolution times by 40%.
- Developed robust data persistence components using Spring JDBC Template, implemented custom Java Collections logic, and applied Role-Based Access Control (RBAC) to boost data access efficiency by 25%.

Court Case Management System	<i>Java, Spring Boot, Microservices, REST APIs, RabbitMQ, MSSQL</i>
-------------------------------------	---

- Developed an asynchronous, event-driven platform utilizing RabbitMQ and Java multi-threading techniques for concurrent background tasks and real-time processing.
- Optimized complex MSSQL queries, stored procedures, and database indexing while managing thread synchronization to eliminate race conditions and reduce query latency by 50%.

Liquor Counter – State-Level Store Management System	<i>Spring Boot, React, MySQL, AWS, Git</i>
---	--

- Led backend development of an inventory architecture deployed across 700+ state retail stores (KSBCL, APBCL, TSBCL).
- Achieved 40% faster billing response times, scaled peak concurrent throughput by 35%, and dropped manual tracking errors by 60%.

EDUCATION

Master of Business Administration in IT (Pursuing) Amity University	2025 – 2027 Remote
---	-----------------------

Bachelor of Engineering in Computer Engineering Sinhgad Institute of Technology, Lonavala	2020 – 2024 CGPA: 9.20/10
---	------------------------------
